48 (RTR ROOSEVELT) The rules that govern our economy no longer work for Americans. For 40 years, economic policies have rewarded large corporations and the wealthiest with the promise that their gains would "trickle down" to everyone else. It hasn't worked. Instead we have faced sluggish growth and economic insecurity for more and more Americans with all the gains going to the top. It is time to rewrite the rules of our economy so small businesses and average American families have a chance too, not just the wealthy and well-connected. That starts with preventing corporations and CEOs from flooding the political process with money so they can manipulate the rules to their advantage. Then we can focus on policies that will grow our economy and level the playing field -rebalancing the tax code so those at the top pay their fair share like the rest of us, changing corporate governance so CEOs prioritize long term investments in workers and their companies over short-term gains and speculation, and ensuring banks do what they're supposed to do and serve America's families and provide loans to productive businesses. We can also raise wages for working people by guaranteeing equal pay for women and create more family-supporting jobs by investing in infrastructure and making college more affordable. We have the power to rewrite the rules of our economy	41	32	11	15	1	73	84

49 (TRICKLE DOWN) Our economy is being crushed by the weight, the cost, the ineptitude, and the corruption of the federal government, and we need to challenge the status quo in Washington to get the economy back on the right track. Exploding government regulation has made it harder for people to see rising incomes and harder for businesses to create new jobs and hire more workers. This has hurt families and stopped growth that would help everyone. But, some continue to push for a new period of big government and big government spending that has failed to end poverty and left more and more people dependent on government. They want more and more regulation that is strangling small businesses. Instead, we need to get government out of the way and give the innovators and entrepreneurs the freedom they need to rebuild the economy from the ground up. We need to get our economy growing much faster by throwing out the corrupt tax code and lowering tax rates. We need to change every aspect of regulations that are job killers, including Obamacare, so that we can increase economic growth, create more jobs, and strengthen the economy for everyone	33	28	14	25	0	61	75

78 (SPLIT G)(RTR) We need an economy that works for the middle class, not an economy governed by trickle down. Today, people struggle to earn enough to sustain a family, yet corporations use donations and lobbyists to manipulate the rules in their favor. It's time to rewrite the rules to promote growth that benefits all Americans. We can't change everything overnight, but we can start by reducing the toxic influence of corporate money in politics. Then we can finally rebalance our tax code so those at the top pay their fair share and we can ensure CEOs behave in a way that helps America, not just their bottom lines. We can rein in the big banks, help small businesses get loans, make sure women get equal pay, and lift the burden of college debt. And we can invest in modernizing our infrastructure and training skilled workers. Let's level the playing field so we can grow the middle class and America again

79 (SPLIT H) (MAINTSTREAM) The economy is doing better but Americans are still uncertain about their future and progress can be undone at any time. We need to promote an agenda of economic growth that will benefit all Americas. Raising the minimum wage, modernizing our infrastructure, and finding ways to make college more affordable will all make Americans more economically secure. We also need to address the shortage of jobs and skilled workers available by modernizing worker training programs that can prepare adults for the good jobs of today and tomorrow. And we need to reform our antiquated tax code to make it easier for businesses to expand here rather than abroad to bring jobs and money back into our economy	32	34	15	17	1	0	66	81

80 (REP STATEMENT) Americans are struggling in an economy that is weighed down by big government's crippling debt, overregulation, and taxes that have made it harder for businesses to grow and create jobs and for families to get ahead. Right now, Washington keeps getting bigger, taxes get higher and American families pay the price. We need to make changes that reduce the size of government and get it out of the way so we can create real economic growth that helps people. This means repealing and replacing the disastrous Obamacare law that has raised health care premiums and cost jobs, and any other regulations that are killing American jobs. We need to cut taxes on the businesses and entrepreneurs so they have more money to expand their businesses and hire more workers, which puts more money into the economy, and to compete with other countries to keep good paying jobs here in America.....	29	21	16	33	1	1	50	66
